

1-POLE TEMPERATURE CONTROLLER "CLASSIC" VT-01C

1-POLE TEMPERATURE CONTROLLER "CLASSIC" VT-01C

These devices automatically switch off the current in the controlled circuit as the temperature is reached, and switch it on again as the temperature falls below the set threshold value. The temperature of the controlled medium is thus maintained within a narrow zone.

Working temperature range: 0 – 400 °C

Areas of application:

- water heaters, hot water storage tanks
- washing machines
- electric cooking hearths and domestic baking ovens

Trouble-free operation is conditioned by proper heat transfer between the controller's sensor and the controlled medium.

TECHNICAL DATA

Lifetime:	50.000 switching cycles	Working range:	-35-77 °C / 0-150 °C / 25-400 °C
Switching power:	20(4)A-4(1)A/250 V~ 16(4)A-4(1)A/400 ~V	Sensor:	Tubular: Cu: Ø 5; Ø 6; Ø 8 INOX: Ø 3; Ø 4; Ø 6
Way of operation:	2BL	Capillary tube:	Ø 1,4 (Cu) / Ø 1 (INOX)
Max.temp. for the main unit:	85 °C / 150 °C	Capillary tube length:	250-2400
Protection class:	Class I. / IP 00	Max. sensor temperature:	Upper switching value +15%
Operation environment:	Normal	Surface protection:	Galvanized
Heat and fire resistance:	D	Length of the shaft:	16 – 50
Leakage current resistance:	≥175	Electrical connections:	Blades, A 6,3x0,8
